PROBABILITY AND STATISTICS

No.	Question	Answer	Mark
1	Define probability.	Probability is the measure of the chance or likelihood of an event occurring.	1
2	What is the range of probability?	The range of probability is from 0 to 1, where 0 represents an impossible event and 1 represents a certain event.	1
3	State the addition rule for two events A and B.	$P(A \cup B) = P(A) + P(B) - P(A \cap B)$	1
4	State the multiplication rule for two independent events A and B.	$P(A \cap B) = P(A) \cdot P(B)$	1
5	Define conditional probability.	Conditional probability is the probability of an event occurring given that another event has already occurred.	1
6	State the formula for conditional probability.	$P(A B) = \frac{P(A \cap B)}{P(B)}$	1
7	Define binomial distribution.	Binomial distribution is a discrete probability distribution that represents the number of successes in a fixed number of independent trials.	1
8	State the conditions for binomial distribution.	1. Fixed number of trials (n). 2. Each trial has two possible outcomes (success or failure). 3. Probability of success (p) is constant for all trials. 4. Trials are independent.	1
9	Define normal distribution.	Normal distribution is a continuous probability distribution that is symmetric and bell-shaped.	1
10	State the properties of normal distribution.	1. Symmetric about the mean. 2. Bell-shaped curve. 3. Mean, median, and mode are equal. 4. Total area under the curve is 1.	1

PROBLEMAS DE CÁLCULO DE LA DERIVADA PARCIAL

PROBLEMA 1. CÁLCULO DE LA DERIVADA PARCIAL

Calcular la derivada parcial de la función $f(x, y, z) = x^2 + y^2 + z^2$ en el punto $(1, 1, 1)$.

Solución: La derivada parcial de f con respecto a x es:

$$\frac{\partial f}{\partial x} = 2x$$

$$\frac{\partial f}{\partial y} = 2y$$

$$\frac{\partial f}{\partial z} = 2z$$

$$\frac{\partial f}{\partial x} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial y} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial z} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial z} = 2$$

$$\frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial z} = 2$$

La derivada parcial de f con respecto a y es:

$$\frac{\partial f}{\partial y} = 2y$$

$$\frac{\partial f}{\partial x} = 2x$$

$$\frac{\partial f}{\partial z} = 2z$$

$$\frac{\partial f}{\partial y} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial x} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial z} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial z} = 2$$

$$\frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial z} = 2$$

La derivada parcial de f con respecto a z es:

$$\frac{\partial f}{\partial z} = 2z$$

$$\frac{\partial f}{\partial x} = 2x$$

$$\frac{\partial f}{\partial y} = 2y$$

$$\frac{\partial f}{\partial z} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial x} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial y} = 2 \cdot 1 = 2$$

$$\frac{\partial f}{\partial z} = 2, \frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial y} = 2$$

$$\frac{\partial f}{\partial z} = 2, \frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial y} = 2$$

Por lo tanto, la derivada parcial de f en el punto $(1, 1, 1)$ es:

$$\frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial z} = 2$$

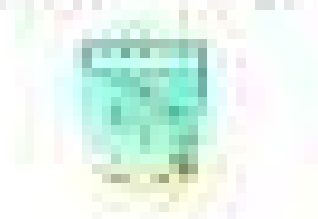

Por lo tanto, la derivada parcial de f en el punto $(1, 1, 1)$ es:

$$\frac{\partial f}{\partial y} = 2, \frac{\partial f}{\partial x} = 2, \frac{\partial f}{\partial z} = 2$$

Por lo tanto, la derivada parcial de f en el punto $(1, 1, 1)$ es:

**REPORT OF THE COMMISSION ON THE STATE OF THE STATE
FOR THE YEAR 1999**

Executive Summary	Detailed Findings
<p>The Commission has identified several key areas for improvement, including the need for a comprehensive review of the state's economic development policies and the importance of strengthening the state's infrastructure.</p>	<p>The Commission's findings are based on a series of public hearings and extensive research. It highlights the need for a more coordinated approach to economic development and the importance of investing in infrastructure to support long-term growth.</p>
<p>The Commission recommends that the state take immediate action to address these issues, including the creation of a task force to study economic development and the establishment of a dedicated infrastructure fund.</p>	<p>The Commission also recommends that the state continue to engage the public in the decision-making process and that it seek to build a coalition of support for its recommendations.</p>

Section 1: Introduction

The Commission was established to provide an independent and objective assessment of the state's economic and social conditions. This report presents the findings of our study and offers recommendations for action.

Section 2: Economic Development

The state's economic development policies have not been fully coordinated, leading to inefficiencies and missed opportunities. A comprehensive review is needed to ensure that the state is maximizing its potential for growth.

Section 3: Infrastructure

The state's infrastructure is in need of significant investment. Without adequate infrastructure, the state's ability to attract investment and create jobs will be severely limited.

Section 4: Public Services

The state's public services, including education and healthcare, are facing significant challenges. Improving the quality and efficiency of these services is essential for the state's long-term success.

Section 5: Conclusion

The Commission believes that the state has the potential for a bright future, but only if it takes the steps necessary to address the challenges identified in this report. We urge the state to act promptly on our recommendations.

(Jenis) : **Real-time PCR (Real-time PCR System)**

Real-time PCR adalah teknik yang digunakan untuk mengamati dan mengukur jumlah salinan DNA target selama siklus amplifikasi. Teknik ini menggabungkan PCR dengan metode deteksi yang memungkinkan pengukuran kuantitatif dari produk PCR. Teknik ini digunakan untuk berbagai aplikasi, termasuk diagnosis penyakit menular, penelitian dasar, dan analisis forensik.

Real-time PCR memiliki beberapa kelebihan yang membedakannya dari teknik PCR konvensional. Salah satunya adalah kemampuan untuk melakukan analisis kuantitatif secara langsung. Teknik ini juga memungkinkan untuk mendeteksi produk PCR secara real-time, sehingga memungkinkan untuk mengidentifikasi produk PCR yang diinginkan dengan lebih akurat.

QUESTION 1: THE EFFECTS OF THE 2008 FINANCIAL CRISIS ON THE UK ECONOMY

Q.1	QUESTION	ANSWER	MARKS
1.1	Define the term 'GDP' and explain its significance in the UK economy.	GDP stands for Gross Domestic Product, which is the total value of all goods and services produced within a country's borders. It is a key indicator of a country's economic health and growth.	10
1.2	Discuss the impact of the 2008 financial crisis on the UK economy, focusing on the areas of unemployment, inflation, and government spending.	The 2008 financial crisis had a significant impact on the UK economy. Unemployment rose sharply, inflation increased, and government spending increased significantly to support the economy.	10
1.3	Explain the role of the Bank of England in the UK economy and how it responded to the 2008 financial crisis.	The Bank of England is the central bank of the UK, responsible for maintaining price stability and supporting the government's economic policies. In response to the 2008 financial crisis, the Bank of England lowered interest rates and implemented quantitative easing to stimulate the economy.	10
1.4	Describe the effects of the 2008 financial crisis on the UK housing market and the construction industry.	The 2008 financial crisis had a devastating impact on the UK housing market and the construction industry. Home prices fell sharply, and many people lost their homes. The construction industry also suffered, with many companies going bankrupt.	10

QUESTION 1: How do the different types of cells in the body differ in their ability to divide and differentiate?

Cell Type	Location / Function	Division / Differentiation
Epithelial cells	Form the lining of organs and tissues	Divide frequently to replace lost cells; differentiate into various cell types based on location
Stem cells	Found in bone marrow and other tissues	Can self-renew and differentiate into all cell types of the body
Neurons	Transmit electrical signals in the nervous system	Do not divide after they are formed; differentiate into different types of neurons
Muscle cells	Contract to produce movement	Do not divide; differentiate from stem cells into muscle fibers
Red blood cells	Transport oxygen throughout the body	Do not divide; differentiate from stem cells into erythrocytes

QUESTION 2: How do the different types of cells in the body differ in their ability to divide and differentiate?

Epithelial cells are found in the lining of organs and tissues. They are able to divide frequently to replace lost cells. They also differentiate into various cell types based on their location.

Stem cells are found in bone marrow and other tissues. They are able to self-renew and differentiate into all cell types of the body.

MEMORANDUM FOR THE SECRETARY, DEPARTMENT OF EDUCATION

Subject: Request for Approval of the Proposed Curriculum Framework for the Revised K-12 Curriculum

To: Secretary, Department of Education

From: Director, Bureau of Curriculum Development

Reference: Bureau Order No. 10, Series of 2013

The attached report of the Curriculum Framework Development Committee (CFDC) on the proposed curriculum framework for the revised K-12 curriculum is being submitted for your review and approval. The CFDC was organized by the Bureau of Curriculum Development (BCD) in accordance with the Department Order (DO) No. 10, Series of 2013, which provides for the development of the revised K-12 curriculum. The CFDC has conducted extensive consultations with stakeholders and has developed a curriculum framework that is aligned with the Department of Education's (DepEd) vision and mission. The proposed curriculum framework is designed to be learner-centered, competency-based, and relevant to the needs of the Filipino people. It is also designed to be flexible and adaptable to the changing needs of society. The CFDC has also developed a set of guidelines for the development of learning materials and assessment tools that are aligned with the proposed curriculum framework. These guidelines are also being submitted for your review and approval.

The proposed curriculum framework and the set of guidelines for the development of learning materials and assessment tools are being submitted for your review and approval. I am confident that the proposed curriculum framework will be a significant contribution to the development of the revised K-12 curriculum and will help to improve the quality of education in the Philippines. I am also confident that the set of guidelines will help to ensure that the learning materials and assessment tools developed are of high quality and are aligned with the proposed curriculum framework. I am, therefore, submitting this memorandum for your review and approval.

Very truly yours,
Francis M. Lacor
Director
Bureau of Curriculum Development
DepEd Division Office - Manila

Approved:
Secretary
Department of Education

PROVA DE FÍSICA - 2014

Questão	Enunciado	Resolução	Resposta
1	Um corpo de massa m desce um plano inclinado de comprimento L e altura h. A força de atrito é constante e vale f. Calcule o trabalho realizado pela força de atrito.	O trabalho realizado pela força de atrito é dado por $W = f \cdot L$.	fL
2	Um corpo de massa m desce um plano inclinado de comprimento L e altura h. A força de atrito é constante e vale f. Calcule a velocidade do corpo ao chegar ao final do plano.	Aplicando o princípio da conservação da energia mecânica, temos: $mgh - fL = \frac{1}{2}mv^2$.	$v = \sqrt{2(g h - \frac{fL}{m})}$
3	Um corpo de massa m desce um plano inclinado de comprimento L e altura h. A força de atrito é constante e vale f. Calcule a aceleração do corpo ao descer o plano.	A aceleração do corpo é dada por $a = g \sin \theta - \frac{f}{m}$, onde θ é o ângulo do plano inclinado.	$a = g \sin \theta - \frac{f}{m}$

Resolução:
 Trabalho realizado pela força de atrito:
 $W = f \cdot L$

Resolução:
 Aplicando o princípio da conservação da energia mecânica:
 $mgh - fL = \frac{1}{2}mv^2$

QUESTION 10: THE EFFECTS OF A CHANGE IN THE PRICE OF A SUBSTITUTABLE INPUT

IN THE SHORT-RUN COST CURVES

OF A FIRM THAT PRODUCES A SINGLE OUTPUT

Case	Isotonic Change	Non-isotonic Change	Output
1	<p> An increase in the price of a substitutable input will shift the short-run cost curves upward and to the right. The short-run cost curves will be steeper at the new equilibrium point. </p>	<p> An increase in the price of a substitutable input will shift the short-run cost curves upward and to the right.
